What is a full-stack engineer

A full-stack engineer is a software developer who is proficient in both front-end and back-end development. They have the skills and expertise to work on all parts of an application, from the user interface to the server and database. Here's a breakdown of their typical responsibilities and skill sets:

## Front-End Development

- **Languages and Frameworks:** HTML, CSS, JavaScript, and frameworks like React, Angular, or Vue.js.
- **Tools and Libraries:** Bootstrap, Sass, jQuery, etc.
- **Design and UX:** Understanding of user experience (UX) design principles and tools like Adobe XD, Figma, or Sketch.
